EDUCATION

BSc. Computer Science

HCMC University of Technology
Aug '17 - July '21

SKILLS

Programing Languages

JavaScript (ES6+), TypeScript, Python,
Solidity, Rust, Golang

Libraries & Frameworks

ReactJS, NextJS, GatsbyJS, GraphQL,
Node.js, NestJS, Flask, Django, PyTorch

Databases

Relational databases
NoSQL databases
Key-value databases

Tools & Platforms

Git, Github Actions, CircleCI, Jenkins
Docker, Kubernetes, Helm, Terraform
GastbyCloud, Netlify, Vercel
Azure, AWS, GCP

WORK EXPERIENCE

Software Engineer

July '21 - Current

KMS Technology, VN

Complion Project

- ✚ Worked as a full-stack engineer in a Scrum team.
- ✚ Delivered solution to support clinical researchers in staff assignment, FDA document management, which aligns with HIPAA compliance.
- ✚ Implemented highly interactive UI/UX experiences using React (with Redux).
- ✚ Designed and built service to handle the integration with 3rd parties using Flask and Azure Service Bus.

Software Engineer

Dec '20 - June '21

KMD Technology, VN

Forbie Project

- ✚ Proposed solution to support doctors in monitoring their patient's treatment progresses.
- ✚ Designed & Implemented web-based dashboard (React, Redux-Saga, Recharts, etc) to monitor survey score of patients
- ✚ Maintained a RESTful micro-services system written in NestJS which not only serves API requests from web portal as well as mobile application but also processes queued background jobs.
- ✚ Maintained a LUIS chat bot, implemented a speech-to-text service based on Azure Cognitive Service to script conversation of patient's doctor engagement.

AI Engineer

Mar '20 - Nov '20

Emage Ltd.

- ✚ Maintained & optimized product which supports users inspect defective components in the manufacturing industry.
- ✚ Researched relevant studies on machine-learning based computer vision: image classification, instance segmentations, etc.
- ✚ Built, customized and engineered several networks (Pytorch/Tensorflow) on Linux machines, extensively worked with Bash (Unix shell), GNU Screen.
